

RYAN PETERSON

PERSONAL PROFILE

I am a dedicated junior web developer that is eager to learn. Recently I have shifted focus from a career in therapeutic services to the path of web development. I am extending my technical skills with hardware into the world of software.

WORK EXPERIENCE

- Created and implemented programs for the individual under my care.
- Managed and communicated responsibilities effectively to other employees.

Reference: Kathleen Curry Griffin (Program Manager)

Cell Phone: 801-891-1181

WEB SOFTWARE PROJECTS

Home Inventory

<https://github.com/ryanjpetererson93/My-Home-Inventory>

<https://home-inventory-2020.herokuapp.com/>

Ruby on Rails backend with a React JS frontend. Styling completed with a mixture of Ant Design and custom styled-components. File uploads managed by React-Dropzone and an Ant Design uploader.

Jeopardy

<https://github.com/ryanjpetererson93/React-Jeopardy>

<https://jeopardy-react11.herokuapp.com/>

Ruby on Rails backend with a React JS frontend. Styling completed using Ant Design components. Text input fields compare the user's answers to seeded data and points are stored locally. Ability to create new data that performs to the same standard as seeded data.

Card Views

<https://github.com/ryanjpetererson93/Card-Views>

Ruby on Rails backend with a React JS frontend. Simple styling completed through the use of styled-components. Read/create functionality for cards generated using random seeded data. Functions written to sort data by the 'likes' attribute of the card.

Miss Beth's Creativity Kits

<https://github.com/ryanjpetererson93/Education-Station>

Ruby on Rails backend with a React JS frontend. Focus on mobile design and responsive behaviors. Styled using a combination of Semantic UI and React Bootstrap. Images uploaded by user through the use of React-Dropzone. Videos displayed though embedded Youtube videos from the site owner's channel.
